AUDIT TYPE:

Announced Audit

AUDIT SCOPE:

An inspection of a 43,000 sqft open facility with two lines packing conventional bulb onions and watermelons. Sourcing early season watermelons from Florida. April to early July season. Up to thirty-five production employees work six-day workweek, twelve hour, staggered shift. Thirteen employees working on the day of the audit. The operation grows, harvests, packs and sells its bulb onion and watermelon products. Watermelons are sourced from Florida. Bulb Onions are transported in plastic bins from the farm, tagged for traceability, force air dried in covered drying tunnels. Bins removed from drying tunnel are tipped into collection hopper, conveyed on a single line conveyor, manually sorted for defects, optically sized, final hand grade, packed into mesh sacks and into master carton, palletized, stored and shipped. Line two was a watermelon line. Watermelons are manually removed from the plastic bin, placed on a line conveyor, sorted for defects, quality and sized. Watermelons are packed into tri-wall corrugated bins by size, coded with traceability, stored at ambient temperature and shipped. Two farms and two packinghouse operations were audited concurrently. Scope for this audit includes a visual survey of structures, packing processes, equipment, employee disciplines, sanitation, storage, shipping and review of the required food safety documentation.

PRODUCTS:

PRODUCT(S) OBSERVED DURING AUDIT

Bulb Onions, Watermelons
